USB On-The-Go

USB OTG is designed to connect devices directly to each other. With USB OTG, for example, images from a digital camera can be stored directly on a directly connected USB stick. To do this, both devices must be OTG-enabled and connected with a USB OTG cable.

Note: According to the current specifications of USB.org we have adapted the technical data of our USB 3 products. The new designation for the already known USB specifications has been changed to USB 3.2 Gen 1 (formerly USB 3.0 / USB 3.1 Gen 1) and USB 3.2 Gen 2 (formerly USB 3.1 / USB 3.1 Gen 2).
