Designed for Professionals
Keystone in proven ROLINE quality!

• The ROLINE Cat.6A Keystones are ideal for use in Gigabit Ethernet networks
They support data transfer rates up to 10 Gbit/s with a bandwidth of 500 MHz
• Connect the cable to the Keystones via LSA connections without special tools - place the cable ends simply into the guides (with color coding), close and compress the module - the connection is ready for use
• The Keystone modules can be "latched" into a 19'' module support rack, which is optionally available in black (26.11.0357) or light gray (26.11.0356).
Or in combination with a module receptacle (25.16.8579) you can realise a junction box.
• The Keystones are coded according to EIA/TIA 568
